LIVING TOY ROBOT — HALLOWEEN MINIFRIDGE

CPX retained | 2 RGB eyes | 3 parallel RGB scene LEDs | all 10 onboard NeoPixels | WAV playback

REV B: three scene RGB LEDs share A3/A4/A5; each color element has its own 3.3k resistor.

BOM: 4 x 2.2k + 9 x 3.3k resistors, >=1/8W. LED physical lead order must be identified before wiring.

No added capacitors, transistors, MOSFETs, driver ICs, or expansion boards. Module internals are factory fitted.

Three parallel scene RGB LEDs; nine 3.3k resistors; no extra GPIO.
