LIVING TOY ROBOT — HALLOWEEN MINIFRIDGE

CPX retained | 2 RGB eyes | 1 RGB scene LED | all 10 onboard NeoPixels | recorded WAV playback

REV A: separate interruption LEDs removed by user; scene LED turns red on interruption.

BOM: 4 x 2.2k + 3 x 1k resistors, >=1/8W. LED physical lead order must be identified before wiring.

No added capacitors, transistors, MOSFETs, driver ICs, or expansion boards. Module internals are factory fitted.

User revision: scene RGB provides interruption red; separate red LEDs removed.
